Table of Contents: Volume 10 (1993)

Number 1

Editorial 5
Conics-Based Stereo, Motion Estimation, and Pose Determination ..... *Song De Ma* 7
Model-Based Invariants for 3-D Vision ..... *Daphna Weinshall* 27
An Analog Network for Continuous-Time Segmentation ..... *John G. Harris* 43
A Review of Statistical Data Association Techniques for Motion Correspondence ... *Ingemar J. Cox* 53
Interpretation of Conic Motion and Its Applications ..... *Wu Liu and Kenichi Kanatani* 67

Number 2

Introduction: Computer Vision Research at INRIA ..... *Olivier Faugeras* 91
A Computational Approach for Corner and Vertex Detection . *Rachid Deriche and Gérard Giraudon* 101
A Theory of the Motion Fields of Curves ..... *Olivier Faugeras and Théo Papadopoulo* 125
Motion Segmentation and Qualitative Scene Analysis from an Image Sequence .....
..... *Patrick Bouthemy and Edouard François* 157
Topological Segmentation of Discrete Surfaces .....
..... *Grégoire Malandain, Gilles Bertrand, and Nicholas Ayache* 183

Number 3

Review
Geometric Invariants and Object Recognition ..... *Isaac Weiss* 207
Design and Recovery of 2-D and 3-D Shapes Using Rational Gaussian Curves and Surfaces .....
..... *Ardeshir Goshtasby* 233
Model-Based Object Tracking in Monocular Image Sequences of Road Traffic Scenes .....
.....*D. Koller, K. Daniilidis, and H.-H. Nagel* 257
